

# ORGANIC MATERIAL DROP OFF FACILITIES at Black Gold

Black Gold accepts **CLEAN<sup>1</sup>** organic materials such as grass, leaves, branches, logs, and wood chips, at both of our locations. We are NOT a garbage dump and very strict policies are enforced for the dumping of ANYTHING that is NOT "**CLEAN**" 100% organic material.

## HOURS OF OPERATIONS

We are predominately a seasonal landscape supply business, whose hours change throughout the year to accommodate our customers. As such we strongly recommend calling (607-562-7026) prior to hauling your truck or trailer load of material. The outgoing Black Gold announcement will advise you of the hours of operation at both organic collection facilities. No dumping before or after hours, without prior written permission from the owner.

## CHARGES

We are a private business and not part of any government agency. Most of our customers are able to drop-off organic material for FREE, however there is a small percentage of customers that will be charged a minimal fee for **mixed loads<sup>2</sup> &/or dirty stumps<sup>3</sup>**. **Fines will apply for garbage, glass, nails, C&D, hardware, or plastic.**

## REGULATIONS

We are happy to serve our community, provide a service that is otherwise a taxpayer's burden, and to do our part in green recycling. Detailed regulations are available at both site's *information center* prior to the gated entrances, at [www.blackgoldtopsoil.com](http://www.blackgoldtopsoil.com) and again nearly all drop offs are **Free**.

***Black Gold's staff and management would like to thank you in advance for your cooperation and understanding to a system of collection that is new to you***

<sup>1</sup> "**CLEAN**" defined as 100% organic material ONLY. No nails, hardware, glass, plastic, C&D, garbage, garbage bags-- absolutely **NOTHING** other than organic material.

<sup>2</sup> "**Mixed loads**" are defined as any two organic products (other than grass and leaves) on the same load. **To avoid any charge, you may be able to sort your load on site and drop off the different materials in their designated areas at that facility.**

<sup>3</sup> "**Dirty stumps**" stumps that have large amounts of soil, stone, clay, and debris entangled within its root system. Dirty stumps are accepted at the Elmira location only.
